PracticeOne and the e-Medsys Solutions Suite Selected by Weight Loss for Life

Tuesday, October 7, 11:45 am, ET

SOMERSET, NJ—(MAERKET WIRE)—October 7, 2008--[PracticeOne](#) is pleased to announce that [Weight Loss for Life](#) has selected the [e-Medsys Solutions Suite](#) to automate their busy weight loss clinic.

Regarding their search process, Anthony Lessa, MD of WLFL said, "We looked at several options when it became evident that our existing automation was not going to make it. There was something very appealing about the [e-Medsys EHR](#) and [e-Medsys PM](#). Both seemed to be very complete and powerful platforms that would let us customize the system to our needs, and to the current requirements of our weight loss practice. The EHR was easy to understand right from the first overview, as was the PM."

Dr. Lessa went further by saying, "Both the e-Medsys EHR and PM are now implemented and in use, and we are more than satisfied. Our initial feelings and reaction are validated: e-Medsys EHR and PM are excellent for our multi-location weight loss practice. PracticeOne implemented and trained quickly; they are a great company and we look forward to bringing more sites online over the next few months. This should be especially easy since we decided on e-Medsys in ASP format instead of Client Server. I can access all patient records from anywhere through a secure internet connection. I no longer have to be in the office to review patients' medical information."

Adding to this is Weight Loss for Life's satisfaction with PracticeOne. "Perhaps the most important feature is the company. PracticeOne provides excellent Support and Customer Service. The level of professionalism, and availability of their Account Managers and Training Department far exceeds our original expectations," noted Dr. Lessa. Dr. Lessa went on to say, "We would not hesitate to recommend PracticeOne and e-Medsys to any other weight loss clinic, or for that matter, to any medical practice of any specialty."

Hank Cohn, PracticeOne President, stated, "One of the leading industries in this country is weight loss, and we could not be happier about Dr. Lessa's comments. PracticeOne is extremely pleased and proud that e-Medsys is making a positive difference at Weight Loss for Life and we look forward to working with the entire WLFL team as they expand e-Medsys usage throughout their network of clinics."

About PracticeOne, LLC (www.practiceone.com):

PracticeOne is a leading national provider of automation solutions. The company's e-Medsys Solutions Suite is excellent for medical practices of every size and specialty, and for **Community Health Clinics (CHC)**. These solutions include (1) the 2007 CCHIT Certified e-Medsys EHR, (2) the e-Medsys PM which is now up to Version 20.1 and (3) the Company's own (not third party) **e-Medsys Patient Access Portal**. e-Medsys systems can be available as ASP / SaaS or Client Server, per the practice's preference; a single database is shared for a truly unified solution. PracticeOne provides timely Implementation, excellent Training and ongoing Support (which always includes Updates).

About Weight Loss for Life:
