### **PracticeOne Approved as a Select EHR Vendor by the Maryland Health Care Commission**

A recent initiative developed by the Maryland Health Care Commission (MHCC) invited vendors having a [2007 CCHIT Certified](#)<sup>SM</sup> Electronic Health Records system to participate in MHCC's EHR Adoption Acceleration initiative. Only systems with 2007 certification were sought due to the higher standard expectations set forth by CCHIT.

PracticeOne proudly announces achieving MHCC Select 2007 EHR Vendor status. Our 2007 CCHIT Certified<sup>SM</sup> [e-Medsys EHR](#) (Version 5.0) was reviewed and, following a rigorous elimination process by MHCC, was determined to be worthy of selection.

Under the collaboration, PracticeOne is offering significant discounts, making e-Medsys EHR a very attractive EHR solution for physicians in Maryland.

"PracticeOne is extremely pleased to have been selected by MHCC. It is another example of the versatility and user-friendliness of our e-Medsys EHR, and the system's applicability to medical practices of every size and specialty," said Hank Cohn, PracticeOne CEO.

Sheryl Miller, PracticeOne SVP of Sales and Business Development, said, "We appreciate the work put forth by MHCC in finalizing the effort and we look forward to bringing e-Medsys EHR to many, many Maryland physicians."

Eleven other states have recently unveiled similar programs, and PracticeOne's intent is to become an approved vendor with those states as well.

Contact PracticeOne at 877-eMedsys (363-3797), Extension 2922 or by email to [info@practiceone.com](mailto:info@practiceone.com) for more information on our [e-Medsys Solutions Suite](#).

About PracticeOne, LLC ([www.practiceone.com](http://www.practiceone.com)): The Company is a leading national provider of automation solutions to medical practices of every size and specialty. These solutions include e-Medsys EHR, [e-Medsys PM](#) (now up to Version 20.1) and the Company's own (not third party) [e-Medsys Patient Access Portal](#). e-Medsys systems can be available as Client Server or ASP / SaaS (per the practice's preference); a single database is shared for a truly unified solution. PracticeOne provides timely Implementation, and excellent Training and ongoing Support (which always includes Updates).
